# FAQ?

## How many sessions do I need?

*On average, 6-8 sessions spaced several weeks apart are recommended.*

*For larger areas upto 12 sessions, regular maintenance may be required. Multiple sessions are required for optimal results since hair grows in cycles and laser treatments are most effective during the active growth phase.*

## Does the laser hair removal hurt?

*We don't believe beauty is pain, that is why our laser is painless.*

## Are there any side-effects?

*There are minimal side-effects when pre-care is followed.*

*Folliculitis, redness and scabbing may occur, but are temporary.*

## How long do the results of laser hair removal last?

*While laser hair removal can significantly reduce hair growth, it's not always permanent as fine hairs cannot always be targeted. Maintenance sessions may be needed periodically to maintain smooth results.*

## Am I the right candidate for Laser?

*Our laser hair removal is effective for all skin type, the only contraindication is red or white hair. Please note a consultation will be done before treatment.*

# FAQ?

## How many sessions do I need?

 *On average, 3 -5 vaginal rejuvenation sessions are required to see long term results.*

Maintenance can also be done when felt necessary, annually or even over a longer period of time.

## Does the Vaginal Rejuvenation hurt?

 It does not hurt, only discomfort may be felt initially at insertion.

## Are there any side-effects?

 *This is non-invasive, you may experience sensitivity so we recommend taking it easy for 24 hours post.*

## How long do the results of last?

 Results, can vary from person to person. Depending on the elasticity of the area, pigmentation may also lighten. It's important to consult with your aesthetician before your session to discuss your expectations.

## Am I the right candidate for Vaginal Rejuvenation ?

 *You need to ensure that you have clear Pap Smear results done in the last 6 months and no copper T's. If you are unsure, we recommend you come in for a consultation.*

# Facials Treatments

*Dr Laser offers a variety of facial and aesthetics treatments catering to all skin types, we aim at treating and maintaining your skin using the latest in technology ensuring effective and long-lasting results.*

**PAGE 10**

# Dry & Sensitive

*Dryness, tightness, flakiness, redness, and irritation are common symptoms. Managing this skin type typically involves using gentle, hydrating skincare products formulated to soothe and moisturize without causing further irritation.*
